

Community Work Study Student Spotlight

Meet Monique

"I volunteered for Deaf and Hard Hearing Services in Pensacola during my senior year in the Community Work Study Program. I was the receptionist and IT specialist. My major is Information Technology so the position was very fitting for me. I have met some great individuals and the staff treats me like their own. This community work study position has led me to great career connections as well. It is great that we can choose community work study because sometimes the jobs on campus fill up quickly. It gives all students a chance to work and have great opportunities!"

-Monique Stafford, Spring 2016 Graduate
